

# The Dinosaur's Diary

Julia Donaldson

When Hypsilophodon's thirteen babies hatch she decides to give them all names beginning with the letter H, such as Henrietta, Horace and Hetty.

At the end of the book her friend Euphocephalus has twelve baby dinosaurs. Can you think of twelve names beginning with E?

Now you have named your baby dinosaurs, why don't you colour them in?

In *The Dinosaur's Diary*, the days of the week are named **Triday** (after Triceratops) and **T-Day** (after T Rex.)

Can you think of names for the dinosaur months of the year?

For example, **Steguary** or **Brontember**.

Use the dinosaur names below to help you. Then, write your dinosaur month next to the month of the year.

**Apatosaurus, Pterodactyl, Stegosaurus, Triceratops, Anchisaurus, Scelidosaurus, Tyrannosaurus Rex, Diplodocus, Eoraptor, Brontosaurus, Megalosaurus, Velociraptor.**
